

**WE RECOGNIZED THE NEED FOR A
STAND-ALONE SANITIZER STATION
THAT WAS CAPABLE OF STORING
A HIGH VOLUME OF SANITIZER.**

SO WE DESIGNED ONE.

**THEN WE FILLED IT WITH 2 GALLONS OF
PREMIUM BOTANICAL-INFUSED SANITIZER.**

B+N Industries, the global leader in innovative design solutions for the retail, architectural, workplace, healthcare, and hospitality industries has partnered with AMASS, a maker of premium, botanically-driven products, to transform the current hand sanitizing experience.

In today's world, frequent cleaning of one's hands is a new social responsibility and the availability of hand sanitizer is now a standard expectation among consumers everywhere. As a pioneer in modern, design-centric solutions, B+N Industries immediately recognized the need for a hand sanitizer dispenser that was both stylish enough to fit into premium environments and easy to maintain given high traffic demands. Through a sleek form factor, the use of color and a new, upbeat logo Mr. Drippy™, B+N Industries created a signature High-Volume Hand Sanitizer station.

To fully deliver on a transformative journey for consumers, B+N required a hand sanitizing liquid that differed from the cold, clinical choices commonly used today. Using her experience as a Master Distiller of Craft Spirits, AMASS co-founder Morgan McLachlan blended a hand sanitizer that exceeds CDC standards for efficacy and uses real botanical extracts to deliver an unparalleled scent.

Together, B+N's High-Volume Hand Sanitizer station and AMASS's naturally scented sanitizing serum offer leading companies an end-to-end solution that is visually and experientially consistent with premium branding. B+N Industries and AMASS believe that creating a better hand sanitizing experience will encourage people to clean their hands more frequently, an act that has positive benefits for all.

HIGH-VOLUME SANITIZING STATION

Our station not only holds a single gallon ready for use, but features a locked door that houses a back-up gallon. It carries eight times more sanitizer than others on the market, cutting down on both wasteful packaging and time spent refilling. And the best part: the unit will pay for itself in 6 months by using gallon containers instead of the smaller packets.

You can bring a splash of color to the scene by selecting from a multitude of powder colors, or by customizing your station with your own provided graphics.

^ Create bright and welcoming messages for the return of your customers, travelers, or co-workers.

^ Choose from 7 powder coat colors, or specify your own. You can also add your own graphics with UV- and alcohol-stable shrink-wrapping, or add custom magnetic graphics.

**HIGH-VOLUME TWO GALLON STORAGE
CUTS DOWN ON WASTEFUL PACKAGING,
TIME SPENT REFILLING, AND COST.**

VS.

^ A view with the door open, showing the extra gallon, adjustable shelf, and optional steel loop in the back for securing with chain.

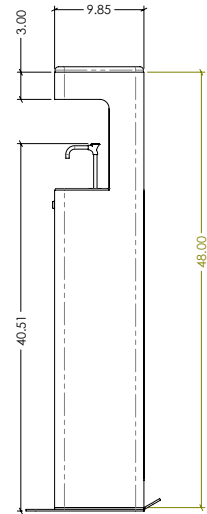

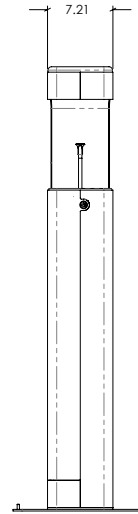

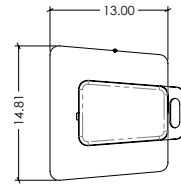

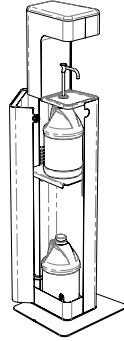

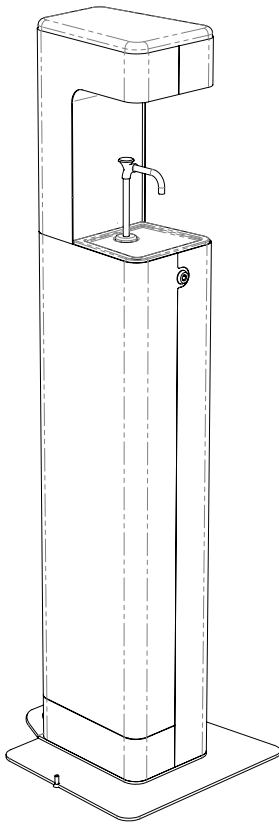

AMASS

BOTANICS FOR MODERN LIFE

AMASS unlocks the power of plants to revitalize daily rituals, both personal and communal. From botanical spirits to body care products, AMASS makes clean botanics for modern life.

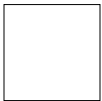

AMASS Hand Sanitizers utilize natural botanicals to transform the experience of hand sanitizer from cold and clinical to sensory and indulgent. The botanical blends are available in several bespoke seasonal scents.
